

ONE HUNDRED SIXTEENTH CONGRESS  
**Congress of the United States**  
**House of Representatives**

7

COMMITTEE ON ENERGY AND COMMERCE

2125 RAYBURN HOUSE OFFICE BUILDING  
WASHINGTON, DC 20515-6115

Majority (202) 225-2927  
Minority (202) 225-3641

January 11, 2019

The Honorable Ajit V. Pai  
Chairman  
Federal Communications Commission  
445 12th Street SW  
Washington, DC 20554

Dear Chairman Pai:

I write to request that on Monday, January 14, 2019, either you or your designate provide an emergency briefing to Committee staff. This briefing should explain why the Federal Communications Commission (FCC) has yet to end wireless carriers' unauthorized disclosure of consumers' real-time location data and what actions the FCC has taken to address this issue to date. An emergency briefing is necessary in the interest of public safety and national security, and therefore cannot wait until President Trump decides to reopen the government.

Bad actors can use location information to track individuals' physical movements without their knowledge or consent. If recent reports detailing the cheap, accurate, and easy accessibility of legally protected, real-time location data are true, we must work expeditiously to address these public safety concerns.<sup>1</sup> If we don't, the privacy and security of everyone who subscribes to wireless phone service from certain carriers—including government officials, military personnel, domestic violence victims, and law enforcement officials—may be compromised.<sup>2</sup>

As you know, Congress addressed this issue when it passed the Communications Act in 1996. That law and its implementing rules require wireless carriers—and their vendors with

whom the information is shared<sup>3</sup>—to safeguard such information<sup>4</sup> and to get users' consent before disclosing it with anyone else.<sup>5</sup>

Last May investigative journalists and Senator Wyden helped bring to light the ease with which consumers' real-time location data was being made available to the public.<sup>6</sup> Following those revelations, the FCC referred the allegations to its Enforcement Bureau for investigation.<sup>7</sup> In June, some wireless carriers publicly committed to addressing the issue and put an end to this unauthorized disclosure.<sup>8</sup> Yet new reports indicate this unfortunate practice continues.<sup>9</sup>

The FCC once again appears to have dragged its feet in protecting consumers. While some carriers have now recommitted to stopping such unauthorized disclosure, the public can no longer rely on their voluntary promises to protect this extremely sensitive information. The FCC must take immediate action to ensure no wireless carrier is allowing the rampant disclosure of real-time location data, and take enforcement action against carriers that violated the Commission's rules and the trust of their customers.<sup>10</sup>

In light of this Committee's commitment to protect the privacy of the American people, I request an emergency staff briefing on this issue, so we can understand when the FCC will put an
